

GDEP Company Profile

GDEP Company Profile

Building Future Together

GDEP is headquartered in Rabat, Morocco, and serves Morocco, Africa, and wider MEA markets through technology partnerships and project reach extending to N'Djamena, Stockholm, and Mogadishu.

What We Do

GDEP combines construction logistics, industrial IoT, and digital delivery expertise to help construction and infrastructure teams see their sites clearly, coordinate deliveries, track assets in real time, and turn site data into decisions.

Core Solutions

- Site logistics and delivery scheduling
- Hybrid IoT asset tracking and site telemetry
- BIM and 3D spatial data integration
- Analytics and operational decision support

Technology Ecosystem

GDEP works with proven technology partners including LogiPlan for construction logistics and scheduling, and Wittra for hybrid IoT asset tracking and telemetry.

Current Focus

GDEP is developing smart projects across Morocco, including Smart Parking and Smart Campus Energy Management at UIT, with IoT intelligence applied to spaces that have traditionally operated on guesswork.
